PROFILE INFO

I am Computer Science Engineering student with hands-on knowledge of data analytics, visualization, and ETL concepts. Skilled in Tableau, SQL, and Power BI and Excel for converting complex datasets into clear, interactive dashboards. Strong analytical thinker with attention to data accuracy, a problem-solving mindset, and a passion for delivering meaningful insights through data.

PROJECTS DONE

Gym Management System in Java

Developed a Gym Management System to efficiently manage member registrations, memberships, attendance, and fee payments. Built an end-to-end application that streamlines daily gym operations through features such as member management, attendance tracking, workout record maintenance, and report generation. Integrated a database for secure storage and retrieval of member information, enabling efficient data management and improved operational efficiency. The system also provides insights into membership status, attendance trends, and revenue records through comprehensive reports.

Hospital Management System in React

Developed a Hospital Management System to streamline healthcare operations by managing patient records, doctor appointments, staff information, and medical histories. Built a responsive web application using React that enables efficient patient registration, appointment scheduling, treatment tracking, and billing management. Implemented user-friendly interfaces and integrated backend services for secure data storage and retrieval. The system improves administrative efficiency, enhances patient care coordination, and provides real-time access to hospital information and reports.

ACHEIVEMENTS

- 1600+problemssolvedinSkill rack including 171+DC/DT
- attended Anvensha 2k6 hackathon in andhre pradesh

HOBBIES

- Building interactive dashboards using Power BI
- Exploring all data and performance analytics

Certifications

- Cisco Networking Academy certifications in Linux fundamentals and network basics.
- Completed SQL Certification on the MongoDB Learning Platform
